

Energy is our Strength

Reinhard Kissler Energiemontagen GmbH & Co. KG

Making Energy and Data Flow

Kissler is a Full-Service Provider for the Installation and Service of Energy and Data Networks

Kissler is specialized in the construction and maintenance of energy and communication networks. Our focus is on the chemical and petrochemical industry, energy suppliers, automotive and telecommunications. Since our founding in Ludwigshafen in 2007, Kissler has grown steadily. Today, with 300 specialists at six locations and the backing of the Freitag Group, we bring combined knowledge, experience and manpower to implement large-scale projects. Our objective is to ensure a dependable and economical supply with energy and data, from the energy utility to industry and the end customer.

Today and in the Future

Readily available energy, fast data and IT systems are the basis of our economy and our daily lives. With technologies such as Industry 4.0, smart energy, high-speed Internet and electromobility, the technical infrastructure becomes even more important.

Integrated Services: The Combination of Know-How and Manpower

Process Control Technology

All Services for Electrical, Instrumentation and Control Engineering

Our specialists install, inspect and maintain instrumentation and control technology to ensure that industrial plants run safely, efficiently and reliably. We work with programmable logic controllers (PLC), fieldbus systems, PROFIBUS and AS-i bus as well as all the internationally common manufacturers and technologies. In the field of process analysis technologies, we install measuring equipment, optimize operating units and set up complete analysis systems. As a result, we help to ensure process and output quality and optimize the use of resources. We commission plants, carry out trouble shootings and provide test documentation. In this way, our clients can set up and operate their plants safely and efficiently.

Electrical and Power Installations

Specialists in Network Construction, Electrical Installation and Cable Routing

Kissler installs high-voltage lines with synthetic cables up to 110 kV as well as GASA, GASI and oil cables up to 220 kV. Regular professional training ensures that our team is always up to date with the latest technologies. Moreover, we are familiar with the design of older systems and install transition technology. Whether connections, transitions and branches in push-on, heat-shrink and cold-shrink technology, terminal sealing for ground and plastic cables as well as cable testing and measuring - Kissler guarantees a reliable supply of energy. In addition, we develop, build and install customer-specific low and high voltage switchgear. In the event of a breakdown, we guarantee the shortest possible response times, expert problem-solving and rapid trouble shooting.

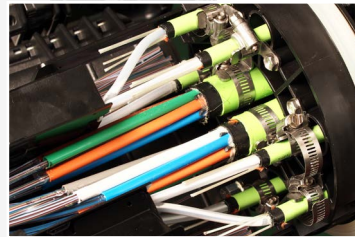

Data and Building Technology

From High-Speed Internet and Communication to the Intelligent Building

As a service partner, we route and install telecommunications networks and broadband Internet (FTTC and FTTH) via copper and fiber optic technology, including all related surface works. We construct shaft and conduit systems and supply the cables with splicing, jointing and distribution technology. For the construction and real estate industry, we offer state-of-the-art solutions, including individual alarm systems, fire protection and monitoring technologies as well as integrated IT and telecommunication solutions. Kissler is a KNX-certified company. We install metering systems and smart metering for gas, water, heat and electricity. With integrated concepts, we integrate all trades to create your intelligent building.

Ready When It Counts

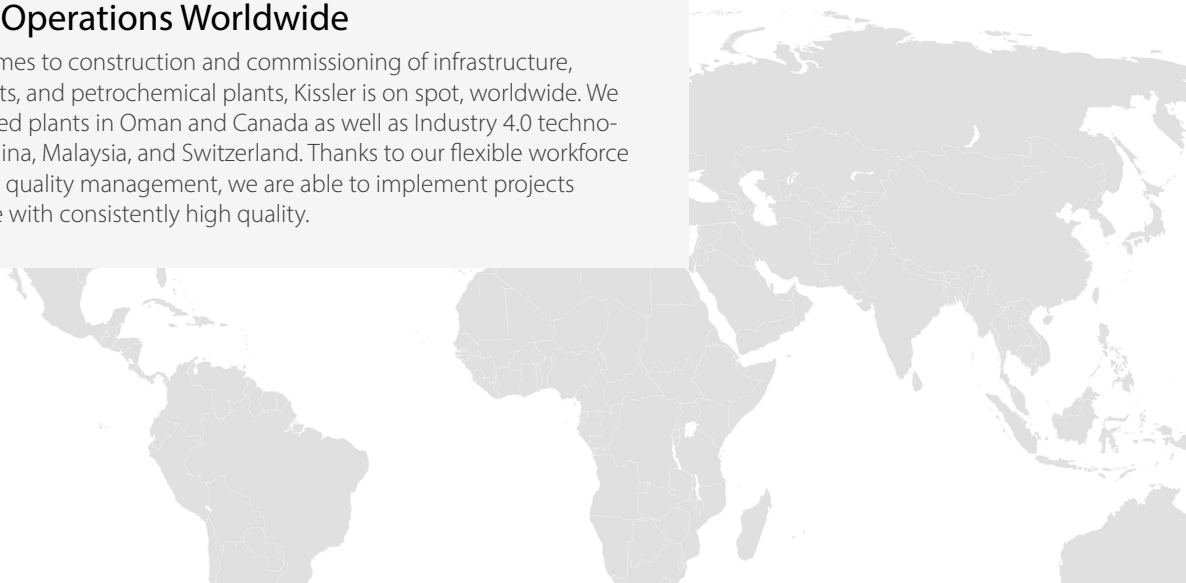

24/7 On-Call Service

Many of our customers operate highly integrated plants and produce around the clock. That is why we are also available at all times. Should unexpected problems or malfunctions occur, simply contact our on-call service. This way, you can be sure that we will solve urgent challenges quickly and professionally at any time.

Special Operations Worldwide

When it comes to construction and commissioning of infrastructure, power plants, and petrochemical plants, Kissler is on spot, worldwide. We have installed plants in Oman and Canada as well as Industry 4.0 technologies in China, Malaysia, and Switzerland. Thanks to our flexible workforce and proven quality management, we are able to implement projects everywhere with consistently high quality.

Quality and Safety Come First

Integrated and Awarded Safety Concept

As specialists for industries such as chemicals and energy, we routinely work in sensitive environments with high safety requirements. The health of all our employees, including our subcontractors and project partners, is always our top priority. We have received multiple awards from customers for our integrated human resources and contractor management.

Specialists and Professionals for all Project Sizes

From small projects and quick assignments to large-scale industrial projects: Intelligent human resources management enables us to respond flexibly and at short notice even to larger demands. If required, we can draw on additional highly qualified professionals within our group of companies and through international partner organisations.

Clients and References

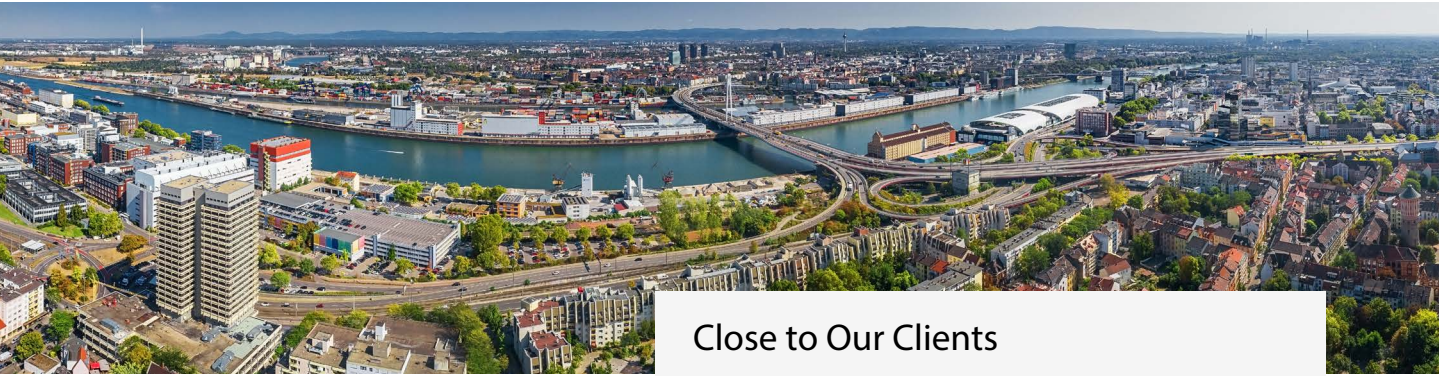

Our clients include leading global companies from the chemical and petrochemical industry, heavy industry, machinery and plant engineering, automotive, pharmaceuticals and telecommunications. We also work for public utilities, energy providers and real estate developers. Please contact us for references.

Certifications and Memberships

- SCC/SCP-certified
- WHG-certified
- ISO 9001:2015-certified
- ECOVADIS-certified
- NAMUR Member

Partner for Energy Services and Data Network Construction in Germany

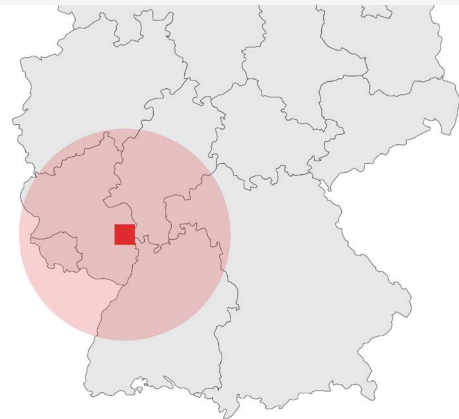

Strong Partners: The Freitag Group

Kissler is part of the Freitag Group. Based in Parsberg, Bavaria, the group employs a total of 2800 specialists for energy technology at 25 locations in Europe. This makes the Freitag Group Germany's largest privately managed energy service provider. Within the Freitag Group, we have additional specialists and technical resources available, for example for emergency assignments and large projects with performance peaks.

Close to Our Clients

In addition to our headquarters in Ludwigshafen, we operate branches and sites in Mainz, Darmstadt, Heppenheim, Grünstadt and Weinheim. This enables us to cover the entire Rhine/Neckar region. On request, within the scope of projects and in emergencies, we are also available at other locations.
